International Journal of Industrial Ergonomics, 7 (1991) 359–360
Elsevier

Author index volume 7

(The issue number is given in front of the page numbers)

Ayoub, M.M., *see* **Hafez, H.A.** (4) 303–309
Amarnath, B.R., *see* **Karwowski, W.** (3) 229–239

Baggett, P. and **Ehrenfeucht, A.**, Building physical and mental models in assembly tasks (3) 217–227
Booher, H.R., MANPRINT implications for product design and manufacture (3) 197–206
Börjesson, S., Prerequisites for alternative working hours in an FMS (3) 241–274
Brown, P.J. and **Yearout, R.D.**, Impacts of leisure activity noise levels on safety procedures and policy in the industrial environment (Case study) (4) 341–346
Burri, Jr., G.J. and **Helander, M.G.**, A field study of productivity improvements in the manufacturing of circuit boards (3) 207–215

Cheng, C. and **Kumar, S.**, A three-dimensional static torso model for the six human lumbar joints (4) 327–339
Cheng, C., *see* **Kumar, S.** (1) 31– 39
Chou, Frank S., *see* **Ma, Wen-Shung A.** (4) 347–355
Courville, J., Vézina, N. and **Messing, K.**, Comparison of the work activity of two mechanics: A woman and a man (Case study) (2) 163–174
Czaja, S.J., *see* **Sharit, J.** (1) 73– 76

Dallner, M., *see* **Wikström, B.-O.** (1) 41– 52
Driels, M. and **Spain, H.**, Perception of two-dimensional shapes using haptic feedback (2) 93–101
Dufresne, R.M., *see* **Kumar, S.** (1) 53– 62

Ehrenfeucht, A., *see* **Baggett, P.** (3) 217–227
Eklund, J., *see* **Freivalds, A.** (2) 181–182
Ellis, N.C., *see* **Haverda, T.H.** (4) 311–316

Fathallah, F.A., Kroemer, K.H.E. and **Waldron, R.L.**, A new finger strength (pinch) gage (Short communication) (1) 71– 72
Fernandez, Jeffrey, E., Strength and range of motion of females with carpal tunnel syndrome (4) 323–326
Fozard, J.L., *see* **Schieber, F.** (2) 133–162
Freivalds, A. and **Eklund, J.**, The role of ergonomics in Sweden as opposed to the US (Focus) (2) 181–182

Garand, D., *see* **Kumar, S.** (1) 53– 62
Genevier, P., *see* **Kostreva, M.M.** (4) 317–322
Gordon-Salant, S., *see* **Schieber, F.** (2) 133–162

Hafez, H.A. and **Ayoub, M.M.**, A psychophysical study of manual lifting in hot environments (4) 303–309
Haverda, T.H., Ellis, N.C. and **Simmons, D.B.**, The visual detectability analysis associate (4) 311–316
Helander, M.G., *see* **Burri, G.J.** (3) 207–215
Hunt, R.M., *see* **Rouse, W.B.** (3) 187–195

Jennings, K.S.B., *see* **Kostreva, M.M.** (4) 317–322

Karwowski, W., Rahimi, M., Parsaei, H., Amarnath, B.R. and **Pongpatanasuegsa, N.**, The effect of simulated accident on worker safety behavior around industrial robots (3) 229–239
Kjelberg, A., *see* **Wikström, B.-O.** (1) 41– 52
Könönen, W., *see* **Värynen, S.** (2) 103–109
Kostreva, M.M., Genevier, P. and **Jennings, K.S.B.**, An algorithm for shift scheduling which considers circadian principles (4) 317–322
Kroemer, K.H.E., *see* **Fathallah, F.A.** (1) 71– 72
Kumar, S., Dufresne, R.M. and **Garand, D.**, Effect of body posture on isometric torque-producing capability of the back (1) 53– 62
Kumar, S., *see* **Cheng, C.** (4) 327–339
Kumar, S., and **Cheng, C.**, Biomechanical analysis of raking and comparison of two rakes (1) 31– 39

Lehto, M.R., *see* **Miller, J.M.** (4) 287–301
Liou, Tian-Shy, and **Wang, Mao-Jiun**, Rotating-shift system vs. fixed-shift system (Case study) (1) 63– 70

Ma, Wen-Shung A., Wang, Mao-Jiun J. and **Chou, Frank S.**, Evaluating the mechanical injury problem in the wood-bamboo furniture manufacturing industry (Case study) (4) 347–355
Malik, S.L., *see* **Mittal, M.** (1) 25– 29
Meshkati, N., Integration of workstation, job, and team structure design in complex human–machine systems: A framework (2) 111–122
Messing, K., *see* **Courville, J.** (2) 163–174
Millard, D.L., Toward a reliable safety sensor implementation for industrial automation (4) 277–286
Miller, J.M., Lehto, M.R. and **Rhoades, T.P.**, Prediction of slip resistance in climbing systems (4) 287–301
Mittal, M., and **Malik, S.L.**, Subjective assessment of lift postures in adult Koli females working at construction sites (1) 25– 29

Nielsen, R., Work clothing (Guidelines) (1) 77– 85

Parsaei, H., *see* **Karwowski, W.** (3) 229–239
Parsaei, H.R., *see* **Tayyari, F.** (2) 175–179
Peters H., Evaluating the heat stress indices recommended by ISO (1) 1– 9
Pongpatanasuegsa, N., *see* **Karwowski, W.** (3) 229–239

Rahimi, M., *see* **Karwowski, W.** (3) 229–239
Rhoades, T.P., *see* **Miller, J.M.** (4) 287–301
Rouse, W.B. and **Hunt, R.M.**, Transitioning advanced interface technology from aerospace to manufacturing applications (3) 187–195

Sainfort, P.C., Stress, job control and other job elements: A study of office workers (1) 11– 23
Schieber, F., Fozard, J.L., Gordon-Salant, S. and **Weiffenbach, J.M.**, Optimizing sensation and perception in older adults (Review article) (2) 133–162
Sharit, J., Viswanathan, V. and **Czaja, S.J.**, A note on computer analysis of a thermocouple-based respiration signal for assessing human–computer interactive task performance (Technical note) (1) 73– 76
Simmons, D.B., *see* **Haverda, T.H.** (4) 311–316
Spain, H., *see* **Driels, M.** (2) 93–101

Takala, E.-P. and **Viikari-Juntura, E.**, Muscle force, endurance and neck-shoulder symptoms of sedentary workers (2) 123–132
Tayyari, F. and **Parsaei, H.R.**, Robotic system safety (Guidelines) (2) 175–179

Värynen, S. and **Könönen, U.**, Short and long-term effects of a training programme on work postures in rehabilitees: A pilot study of loggers suffering from back troubles (2) 103–109
Vézina, N., *see* **Courville, J.** (2) 163–174
Viikari-Juntura, E., *see* **Takala, E.-P.** (2) 123–132
Viswanathan, V., *see* **Sharit, J.** (1) 73– 76

Waldron, R.L., *see* **Fathallah, F.A.** (1) 71– 72
Wang, Mao-Jiun, *see* **Liou, Tian-Shy** (1) 63– 70
Wang, Mao-Jiun J., *see* **Ma, Wen-Shung A** (4) 347–355
Weiffenbach, J.M., *see* **Schieber, F.** (2) 133–162
Wikström, B.-O., Kjellberg, A. and **Dallner, M.**, Whole-body vibration: A comparison of different methods for the evaluation of mechanical shocks (1) 41– 52

Yearout, R.D., *see* **Brown, P.J.** (4) 341–346
